About Me

I have worked as a developer for over twenty years. Through all of that time I have continued to learn and keep pace with the current state of the industry. I have had various responsibilities including development, server management, team management, and client relations. I have handled all of these challenges, but what I enjoy most is the development work.

Experience

Varcode 2025 - Present

Tech Lead - Managing several websites running React with a .NET webservice connected to MSSQL. Also managing a mobile application available on both Android and iOS.

Electronic Tenant Solutions (Inhabit) 2012 - 2025

Senior Engineer Tech Lead (2021 - 2025) - I have continued to work on our commercial property management tools while taking on a larger role guiding the choices for technologies used and the direction in which the application is developed. I have also been running scrum meetings and planning development for our applications.

Senior Developer (2012 - 2021) - Working as part of a team of developers expanding and maintaining a suite of tools for commercial property management. This includes setting up and maintaining both Windows and Linux servers. We also migrated our hosting environment to a new location twice during this time.

TanqBay 2011 - 2015

Co-owner - Designing and building several Android applications including a hotel booking application, a word search, and an application that creates notifications for stock market opening and closing times. I also created a website that was used alongside the hotel booking app.

American Web Design 2006 - 2012

Web Application Engineer - Designing and building web applications and web sites using Coldfusion, MSSQL, javascript and html. Building and maintaining the company brand of ecommerce software. Integrating with Paypal, Ebay, Amazon, Quickbooks and various other systems using XML, and JSON webservices along with several other technologies. Building and maintaining an oil well mapping android application. Setting up and maintaining Windows Server 2003 and 2008 web servers and database servers.

Education

Montana State University - Bozeman, MT (1998 - 2003)

Flathead High School - Kalispell, MT (1998)
